

Amendment to the Specification

Please replace the first paragraph on page 4 with the following rewritten paragraph:

Figure 3: Graphic representation of the average expression of GUS enzyme in primary transformants of (A) tomato, (B) oilseed rape and (C) potato. GUS expression was determined visually and compared to a high level expressing 35S GUS transgenic tobacco plant ranking a score of 4. Standard deviation of the measured values are indicated on each of the bars.
